***Drawings***

Figure 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

**REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Claims 1-3 are allowed as the prior art does not teach or suggest the applicant's invention. Claims 1 and 2 teach a method and apparatus for a data library. The distinguishing elements of the claims teach a magazine having a plurality of recording medium cassette storage positions linearly arranged in a longitudinal direction, the data library device picking up a target recording medium cassette from the magazine and setting the target recording medium cassette into a drive, detecting insertion of the magazine into the data library device casing and starting suction of the magazine toward a deep end of the data library device casing; reading an identification code recorded on the recording medium cassette at a timing when the cassette passes a read area of a read device arranged on

the data library device casing, and storing the identification code in correspondence with the storage position; and transferring the recording medium cassette between the magazine and the drive according to the stored data.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Owens et al. (U.S. Pat. 6,693,759) is cited for compact form factor for an automated tape cartridge auto loading library system. Hoelsaeter et al. (U.S. Pat. 6,873,491) is cited for cartridge orientation apparatus for cartridge storage magazines.
